AMD FirePro™ 2460 Multi-View

PROFESSIONAL GRAPHICS

Multiple Outputs, Multiply Your Output™

Key Features:

→ Low profile half length form factor

→ Quad DisplayPort and DVI output

→ Lower board power <20W

→ Three year limited warranty

→ 512MB graphics memory

→ Hardware acceleration of DirectX® 11 and OpenGL® 4.1

→ PCI Express® 2.1 compliant

Mini DisplayPort to DVI adapter
(included)

Mini DisplayPort to DisplayPort adapter
(sold separately)

Important: When using Mini DisplayPort-to-singlelink DVI adapters, quad output is divided into two pairs (displays 1 and 2, and displays 3 and 4). The displays used in each pair must be identical (with the same manufacturer and model number) and must be identically configured (with the same resolution). The pairs do not have to be identical to each other, however.

The ATI FirePro™ 2460 Multi-View is the first low profile, quad Mini DisplayPort capable solution available— allowing users to expand their field of view across four large (30") high-resolution displays.

Featuring AMD Eyefinity[1] multi-display technology, the ATI FirePro™ 2460 is an ideal solution for anyone whop needs the space-saving advantages of a small form-factor PC but also wants the advantages of high quality, high resolution displays. With support for up to 16 megapixels of display data[2], the ATI FirePro™ 2460 allows the busiest of multi monitor users to have enough display real estate to manage all of their needs.

As the first low profile, passively cooled, quad mini DisplayPort capable solution, the ATI FirePro™ 2460 is designed for completely silent running to help prolong life. That, coupled with a three-year limited warranty plus a planned lifecycle of up to four years, helps ensure that the ATI FirePro™ 2460 will be a reliable solution for your professional multi display needs for many years to come.

ATI FirePro™ 2460 has a single, stable and robust Windows 8, Windows® 7 and Windows Vista® driver, and can support a stretched desktop across four screens[3], allowing applications to treat this desktop as a single large surface that displays content virtually seamlessly across all four displays.

Innovation and Reliability from a Technology Leader

AMD FirePro™ professional graphics have been engineered to deliver innovation and reliability for a wide range of professional operating environments, including Windows 8, Windows® 7, Windows Vista® and Linux®[4]. The unified driver, which supports all AMD FirePro™ workstation products, helps reduce the total cost of ownership by simplifying installation, deployment and maintenance.

Features	Benefits
Flexible Output Configurations	Capable of driving multiple ultra high resolution monitors for the maximum amount of screen space
Unified Driver Architecture	Simplifies maintenance and system administration
Passive cooling	Optimal cooling solution helps increase MTBF, enabling higher reliability and stability
Low Profile Design	Allows installation in the smallest form factors, notebook docking stations, or full height systems
512 MB on-board graphics memory	High performance for graphics intensive applications, including full Microsoft® Windows Aero support in Windows Vista®
Low power consumption	Enables use in smaller, more energy efficient systems
